TOUROPS OPERATIONS MANUAL

Per-Role SOP — Tourops

Detailed operating guide by role, with screenshots taken from the live application.

This document focuses on workflow, access, checklists, warnings, and visual proof for each role.

Usage notes

- Use this document as the daily operational reference.
- Screenshots are taken from the UI tester artifacts and represent the actual app pages.
- Each role gets a concise SOP, a checklist, and one main screenshot.

Contents

1. 1. Super Admin
2. 2. HQ Admin
3. 3. Country Manager
4. 4. City Manager
5. 5. Hotel Manager
6. 6. Transport Manager
7. 7. Guide Manager
8. 8. Sights Manager
9. 9. Content Editor
10. 10. Flight Agent
11. 11. Tour Builder
12. 12. Supplier
13. 13. Tour Leader
14. 14. Accounting
15. 15. Support Agent
16. 16. Operations Manager
17. 17. Customer

Super Admin

Home route: `/admin`

Owns the entire system: governance, final approvals, access control, and cross-module verification.

Login credentials

- **Username:** superadmin1
- **Password:** password123

Main responsibilities

- Oversees the whole workspace: master data, tours, pricing, bookings, suppliers, and reports.
- Sets operational direction and keeps data structures consistent across modules.
- Acts as the final approver for important data that affects sales and operations.

Daily workflow

1. Open the Admin Portal and review the operational dashboard.
2. Check master data, tours, rates, and workflows that need action.
3. Validate critical changes before publish or activation.
4. Use audit and report menus to confirm there are no anomalies.

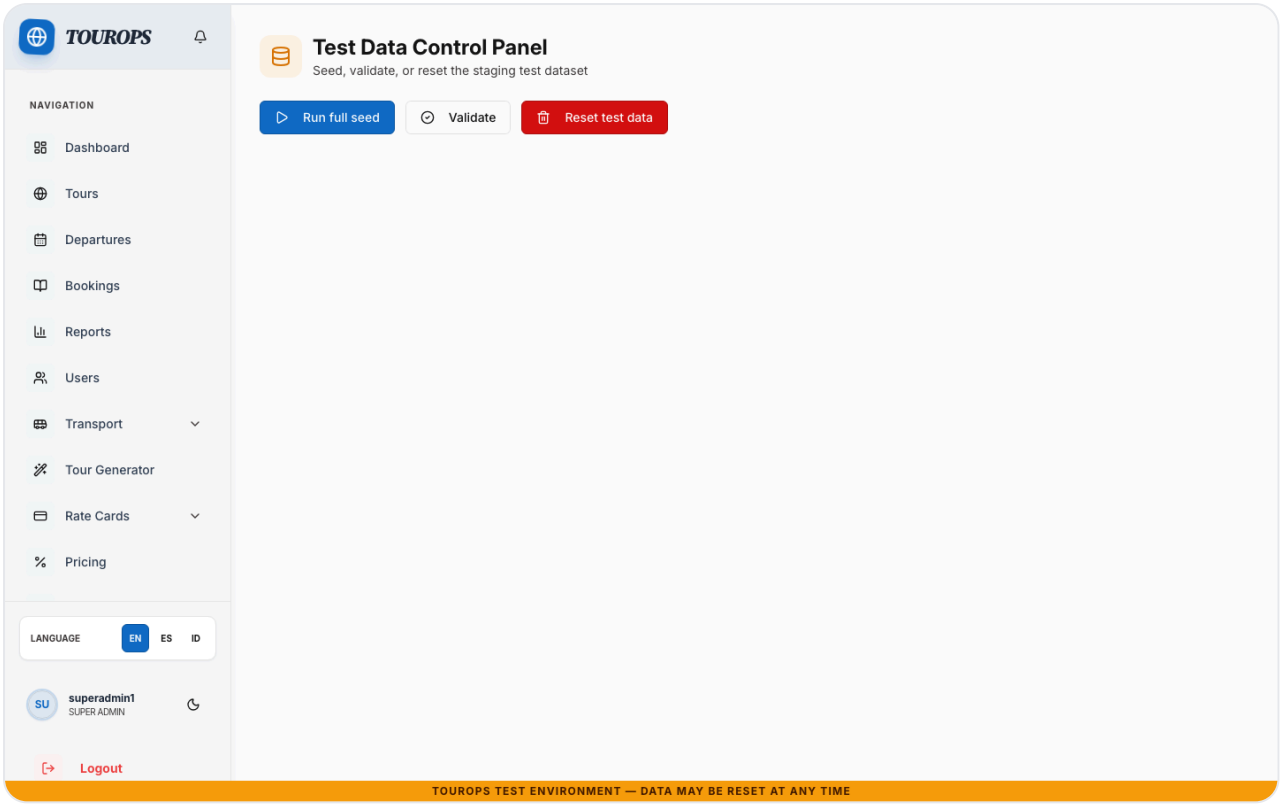

Validation checklist

- No duplicate data.
- User roles and access are correct.
- Rates, quotes, and tours match policy.
- Critical changes are documented.

Warnings / watch-outs

- Do not publish unvalidated data.
- Do not approve rates that are not linked to master data.

App screenshot

Super Admin full workspace

HQ Admin

Home route: `/admin`

Manages central operations: tours, pricing, master data, and day-to-day approvals.

Login credentials

- **Username:** admin1
- **Password:** password123

Main responsibilities

- Builds and updates tours, pricing, and rate cards.
- Maintains the master data used by all departments.
- Handles approvals and corrections submitted by suppliers or operational teams.

Daily workflow

1. Open the admin dashboard and check notifications or pending tasks.
2. Review the pricing engine and the newest quotes.
3. Inspect newly added master data and rate cards.
4. Ensure tours are ready before publishing.

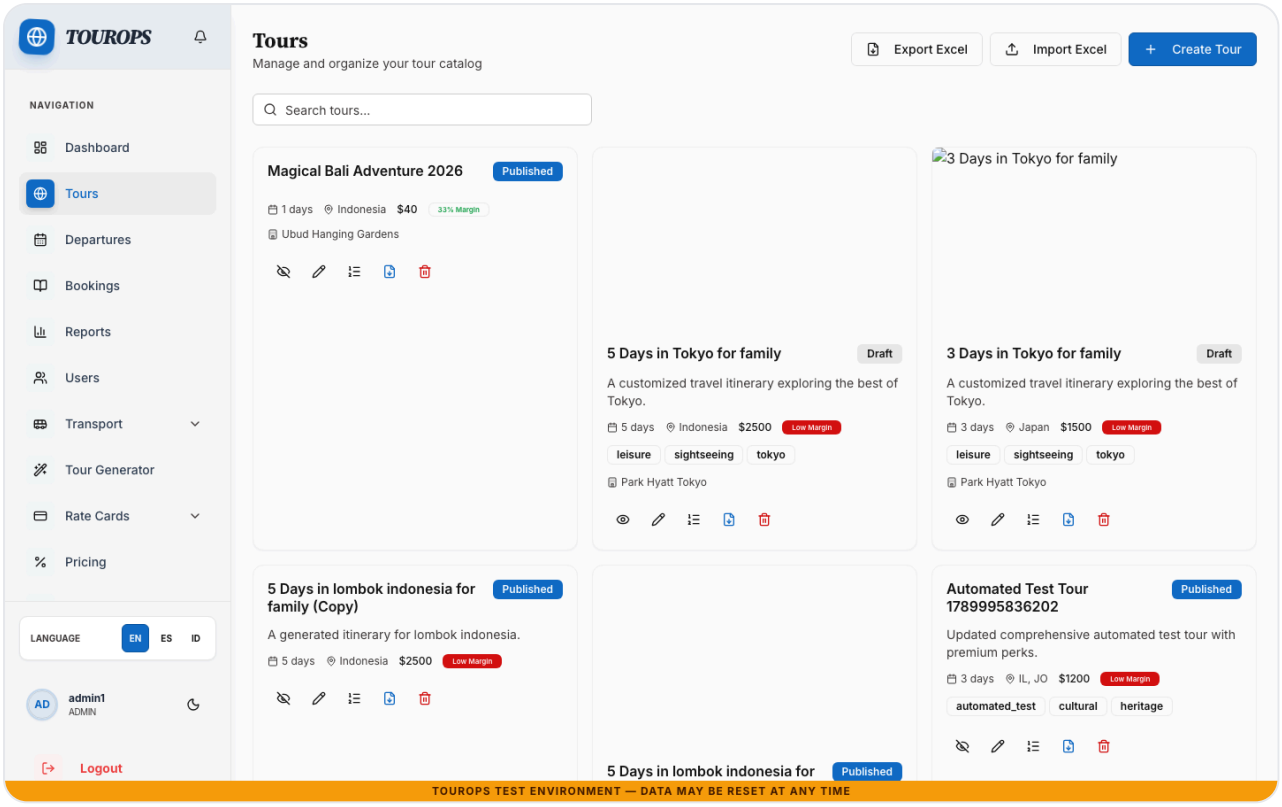

Validation checklist

- Tour title, itinerary, and countries are correct.
- Active rates are within the valid period.
- Quotes use the latest pricing data.

Warnings / watch-outs

- Do not edit rates without checking the master-data relationship.
- Do not publish a tour while its itinerary is incomplete.

App screenshot

Pricing Engine / Admin

Country Manager

Home route: `/ops`

Manages country-level reference data so cities, hotels, and tours stay aligned.

Login credentials

- **Username:** countrymanager1
- **Password:** password123

Main responsibilities

- Keeps country master data accurate and valid.
- Helps maintain the country/region structure used by cities and hotels.
- Ensures country references stay consistent across the platform.

Daily workflow

1. Open the operations or master-data area relevant to the country.
2. Review new or changed country records.
3. Validate cities and tour products linked to that country.

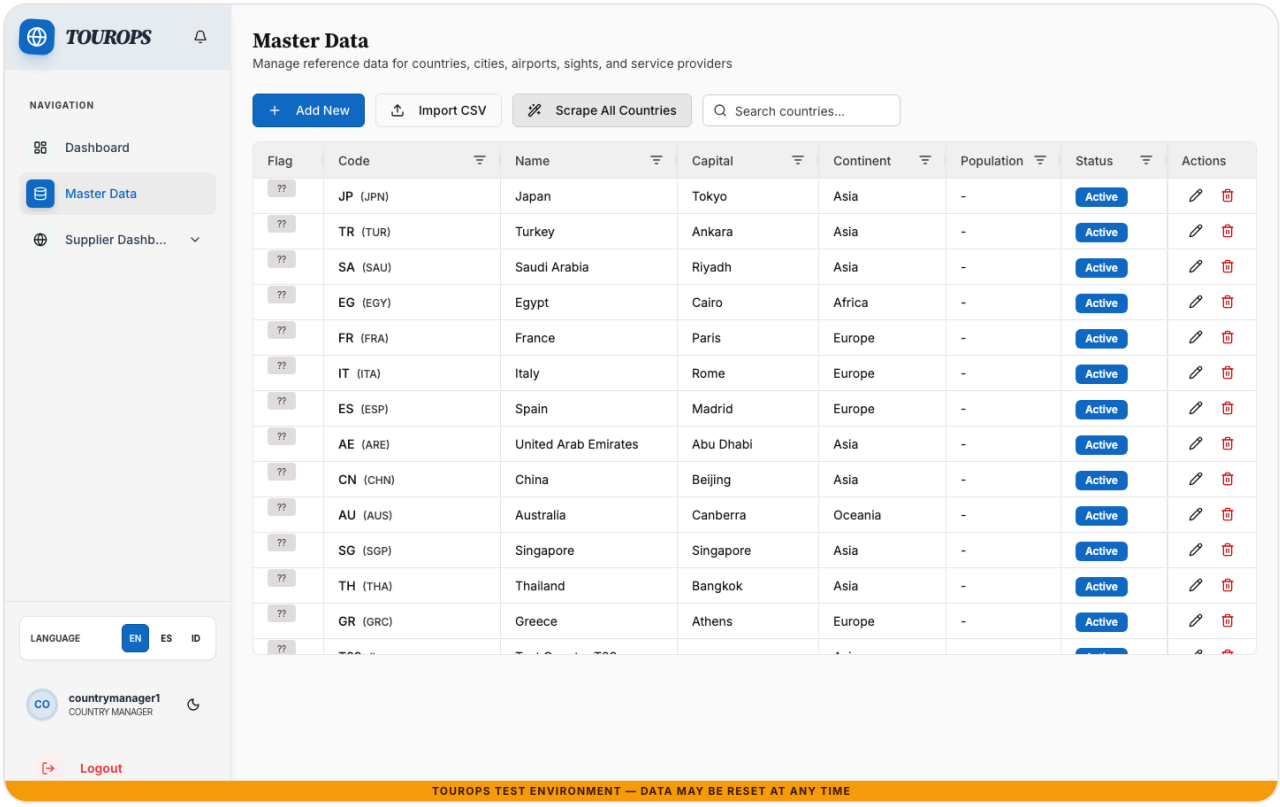

Validation checklist

- Country code is correct.
- Country name is unique.
- Linked cities are in sync.

Warnings / watch-outs

- Do not change country codes without coordination.
- Do not create alternate country names that cause confusion.

App screenshot

Country Manager view

City Manager

Home route: `/ops/city-manager`

Owns city-level data used by hotels, transport, and itinerary planning.

Login credentials

- **Username:** citymanager1
- **Password:** password123

Main responsibilities

- Adds and updates city records.
- Links cities to the correct country.
- Keeps city naming consistent for search and filtering.

Daily workflow

1. Open the city-manager workspace.
2. Review new cities and region references.
3. Check whether the city is already used in hotels, rates, or tours.

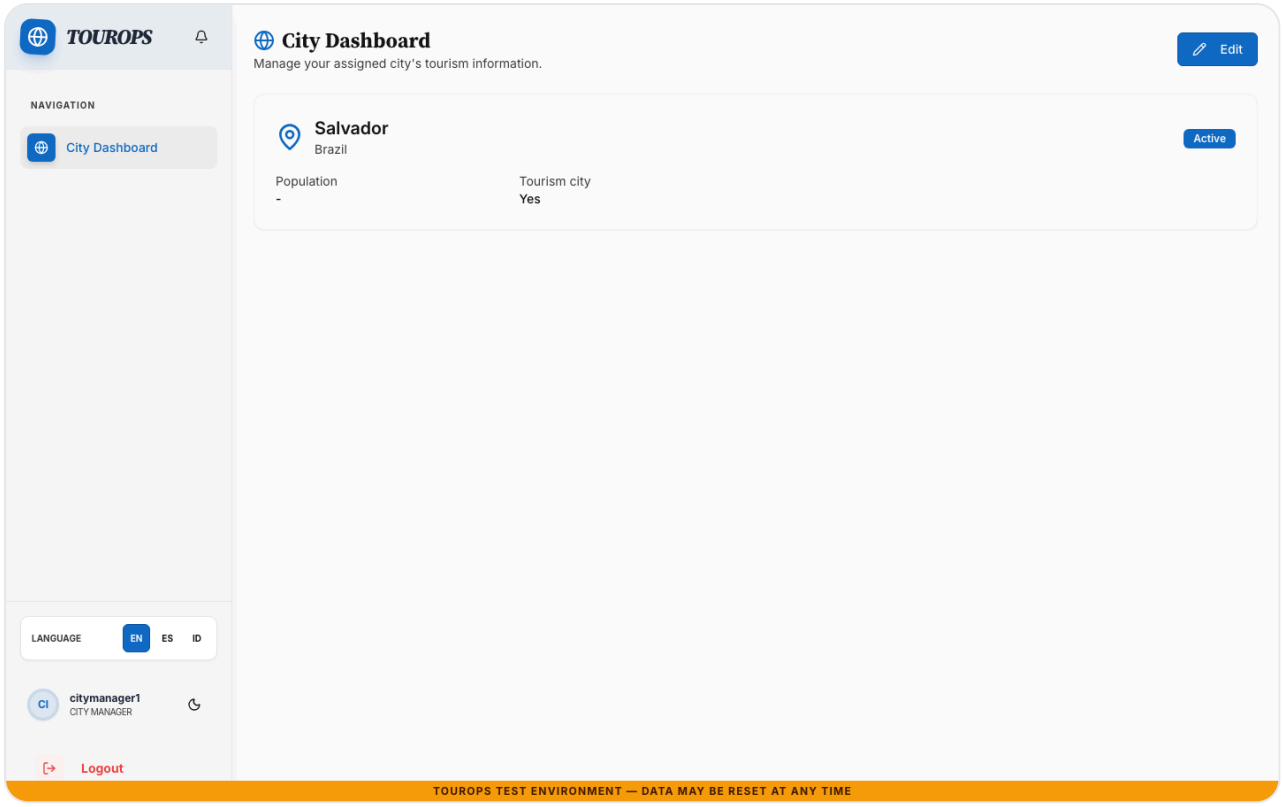

Validation checklist

- Parent country is correct.
- City name is consistent.
- No duplicate spelling or variants.

Warnings / watch-outs

- Do not create a city without a clear country.
- Do not rename a city if it is already widely used.

App screenshot

City Manager view

Hotel Manager

Home route: `/supplier`

Manages hotel catalog records, hotel rates, and accommodation availability.

Login credentials

- **Username:** hotelmanager1
- **Password:** password123

Main responsibilities

- Registers new hotels and fills in property details.
- Maintains nightly room rates that feed pricing.
- Ensures every hotel rate is linked to the hotel catalog.

Daily workflow

1. Open the Supplier Dashboard hotel tab.
2. Review the hotel catalog and active rates.
3. Add or update hotel rates based on country and city.
4. Confirm the status and validity dates are correct.

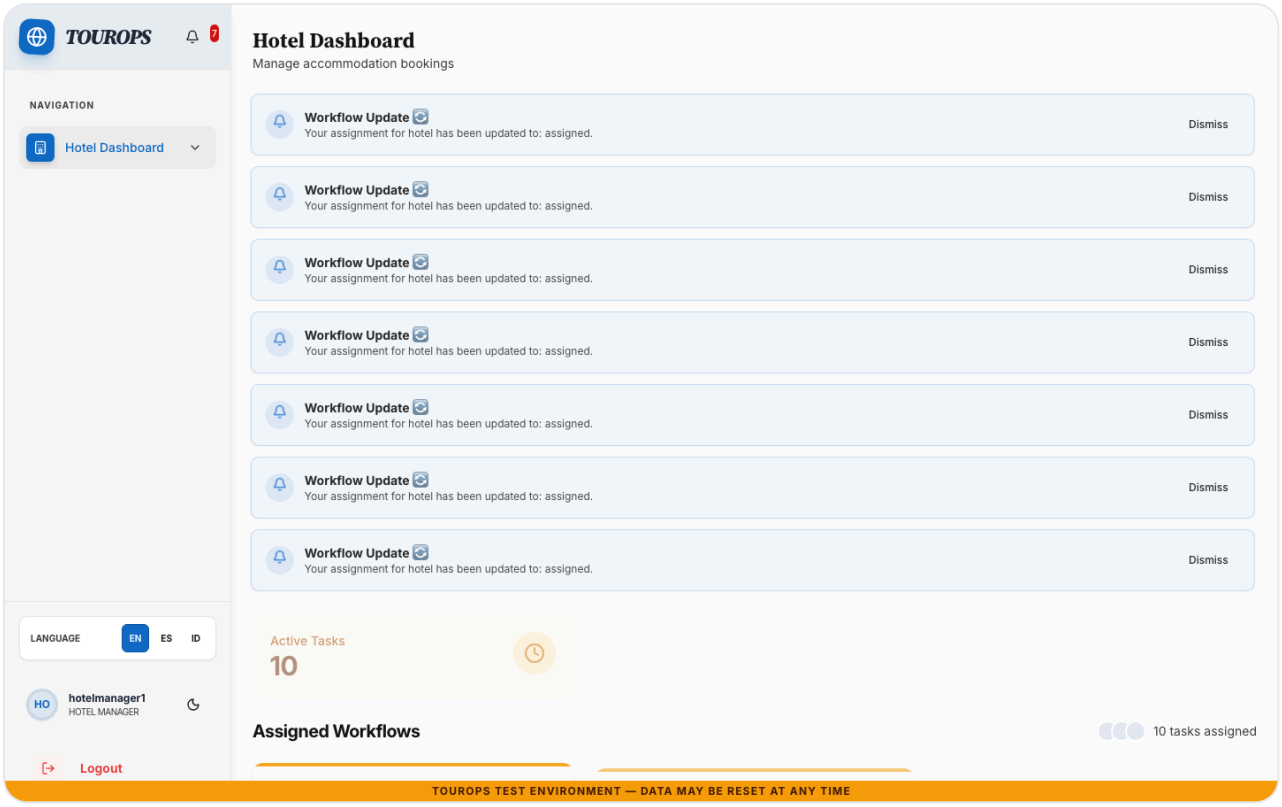

Validation checklist

- Hotel is selected from the catalog dropdown.
- Country and city match the hotel.
- Price, currency, and validity dates are valid.

Warnings / watch-outs

- Do not type hotel names manually when a catalog hotel already exists.
- Do not create a rate without a hotel relation.

App screenshot

Supplier Dashboard - Hotel Manager

Transport Manager

Home route: `/supplier`

Owns vehicle/vendor transport data and route pricing.

Login credentials

- **Username:** transportmanager1
- **Password:** password123

Main responsibilities

- Maintains transport vendor data.
- Keeps rates by route, city, and capacity.
- Supports tour builders and pricing operations.

Daily workflow

1. Open the transport tab in Supplier Dashboard.
2. Check vendors and active rates.
3. Update pricing when operating costs change.
4. Validate vehicle type and routes.

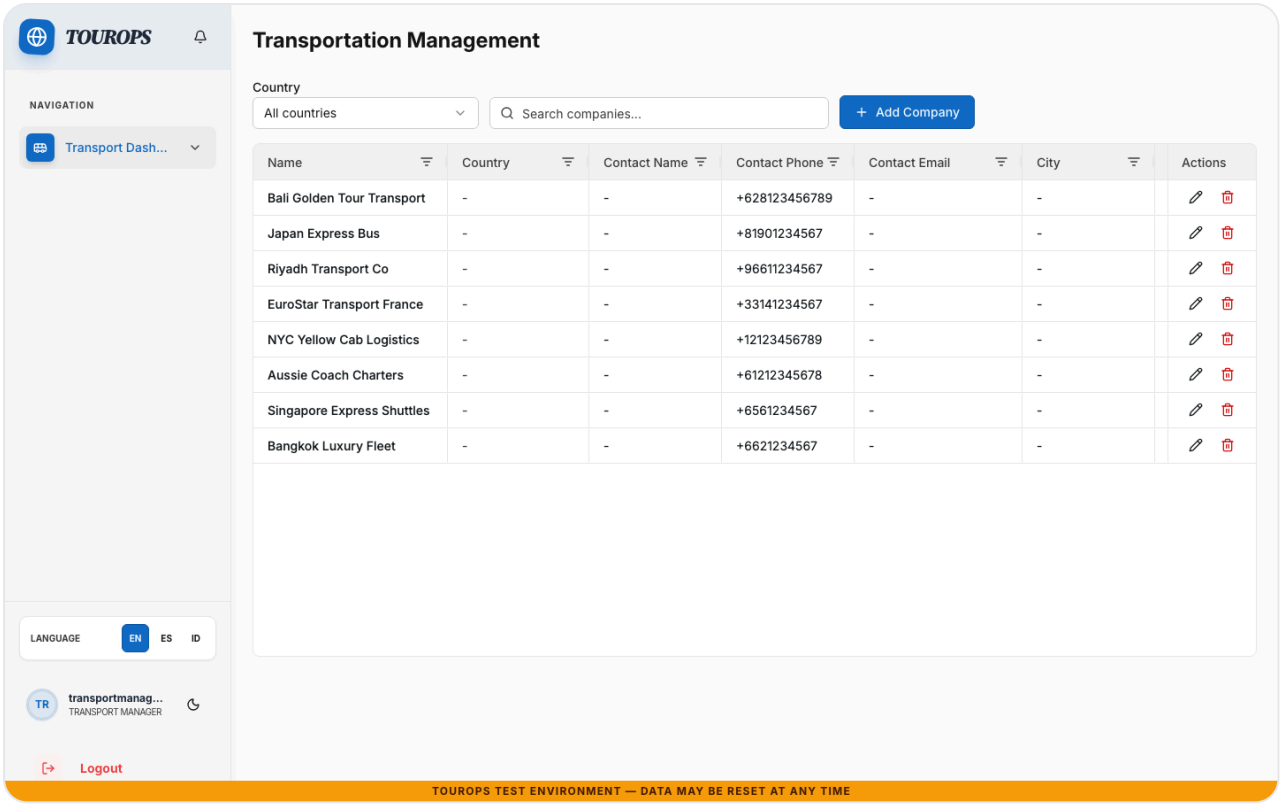

Validation checklist

- Vendor name matches the catalog.
- Rate mode is correct.
- Vehicle capacity is accurate.

Warnings / watch-outs

- Do not save a rate if the route is unclear.
- Do not use unapproved pricing data.

App screenshot

Supplier Dashboard - Transport Manager

Guide Manager

Home route: `/supplier`

Manages guide profiles, languages, and guide rates.

Login credentials

- **Username:** guidemanager1
- **Password:** password123

Main responsibilities

- Adds new guides or updates existing profiles.
- Maintains rates by language, duration, or service type.
- Keeps guides ready for itineraries and bookings.

Daily workflow

1. Open the guide rates tab in Supplier Dashboard.
2. Review the guide list and active status.
3. Update pricing or contact details when needed.
4. Ensure languages and availability fit demand.

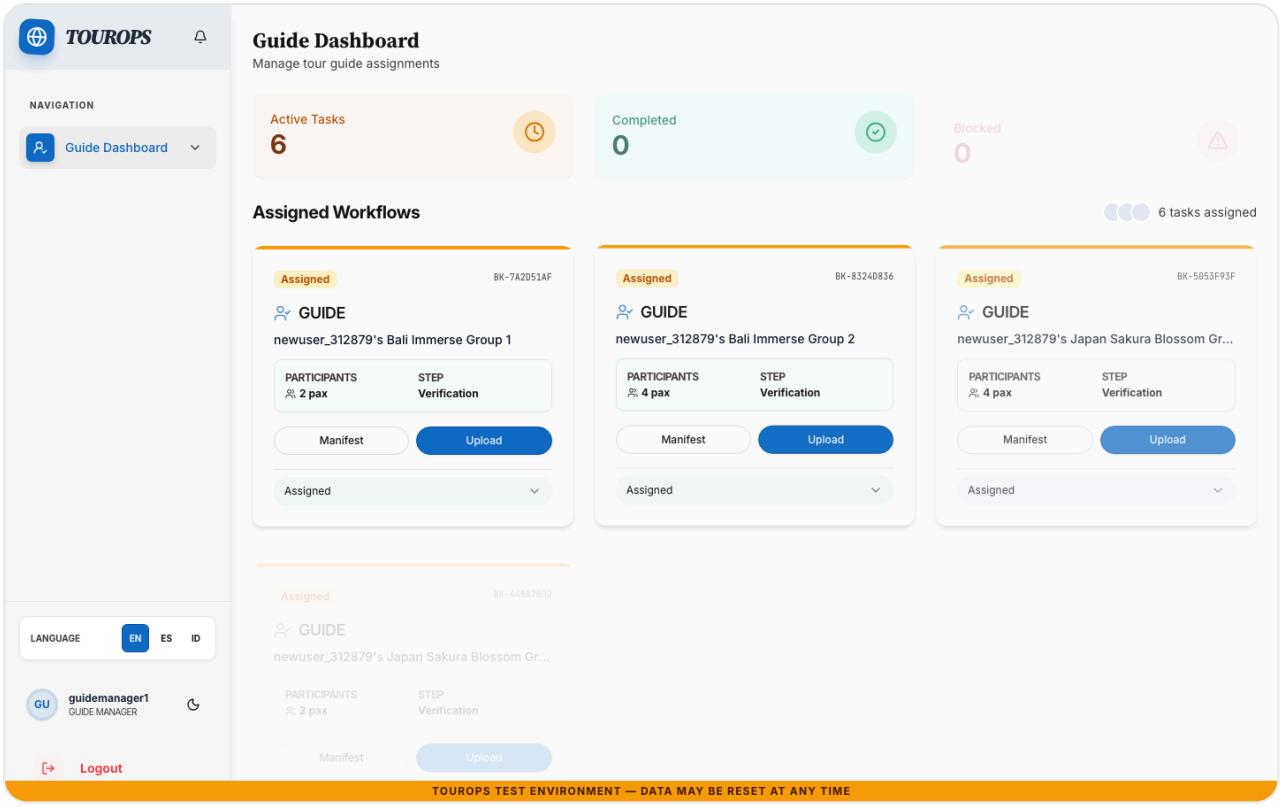

Validation checklist

- Guide name is correct.
- Language and contact details are filled in.
- Rate is active and valid.

Warnings / watch-outs

- Do not disable a guide without notifying operations.
- Do not change contact data without verification.

App screenshot

Guide Manager view

Sights Manager

Home route: `/supplier`

Owns attraction, ticket, and entry-price data.

Login credentials

- **Username:** sightsmanager1
- **Password:** password123

Main responsibilities

- Registers attractions and sights.
- Maintains ticket type, price, and validity.
- Keeps sights data ready for the tour builder.

Daily workflow

1. Open the sights catalog/rates tab.
2. Add or update attraction records.
3. Check ticket prices and active status.
4. Keep attraction names consistent.

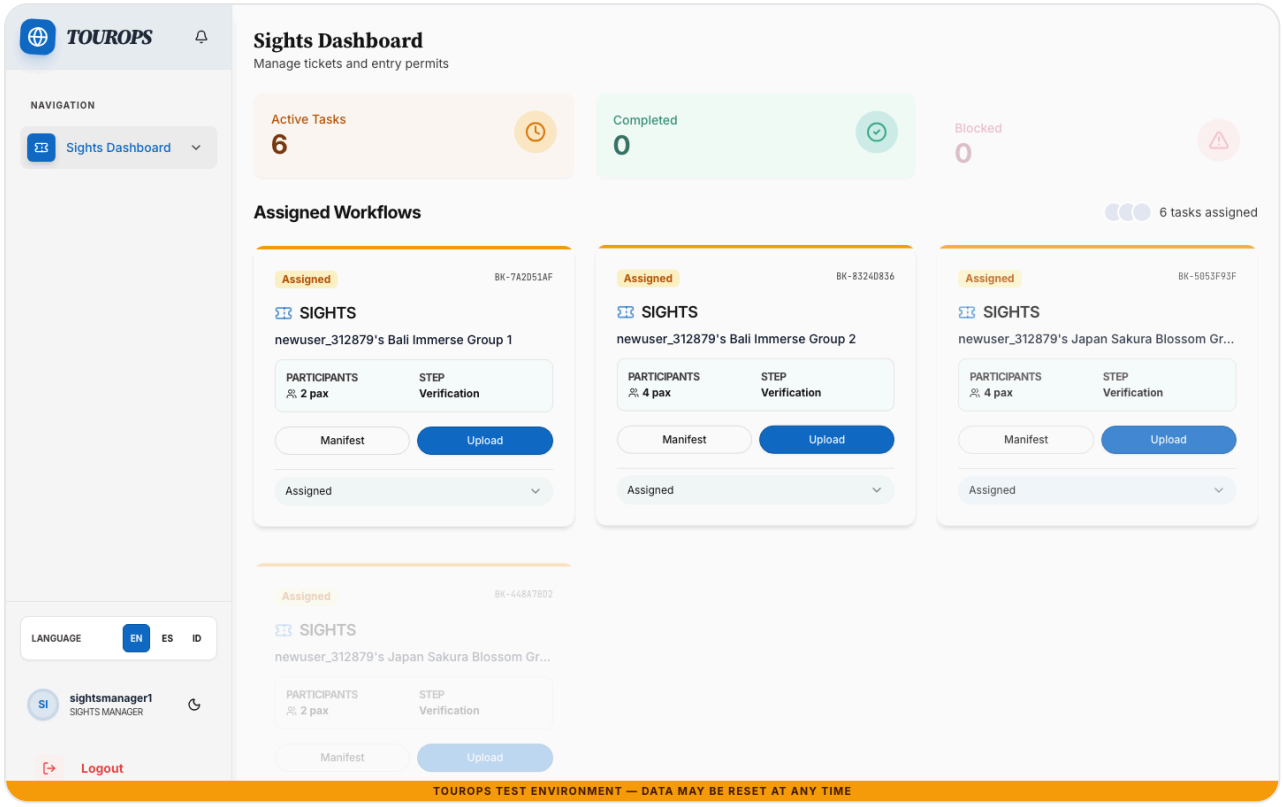

Validation checklist

- Attraction name is clear.
- Ticket type matches the product.
- Price and validity dates are valid.

Warnings / watch-outs

- Do not create duplicate attractions.
- Do not rename without coordinating with the tour team.

App screenshot

Sights Manager view

Content Editor

Home route: `/ops/content-editor`

Owns copy, tour content, and customer-facing text.

Login credentials

- **Username:** contenteditor1
- **Password:** password123

Main responsibilities

- Updates tour text, descriptions, and page copy.
- Keeps language and translations consistent.
- Helps ensure content is ready for publishing.

Daily workflow

1. Open the content editor page.
2. Review text that needs correction.
3. Update descriptions, highlights, or other tour content.
4. Check terminology consistency across languages.

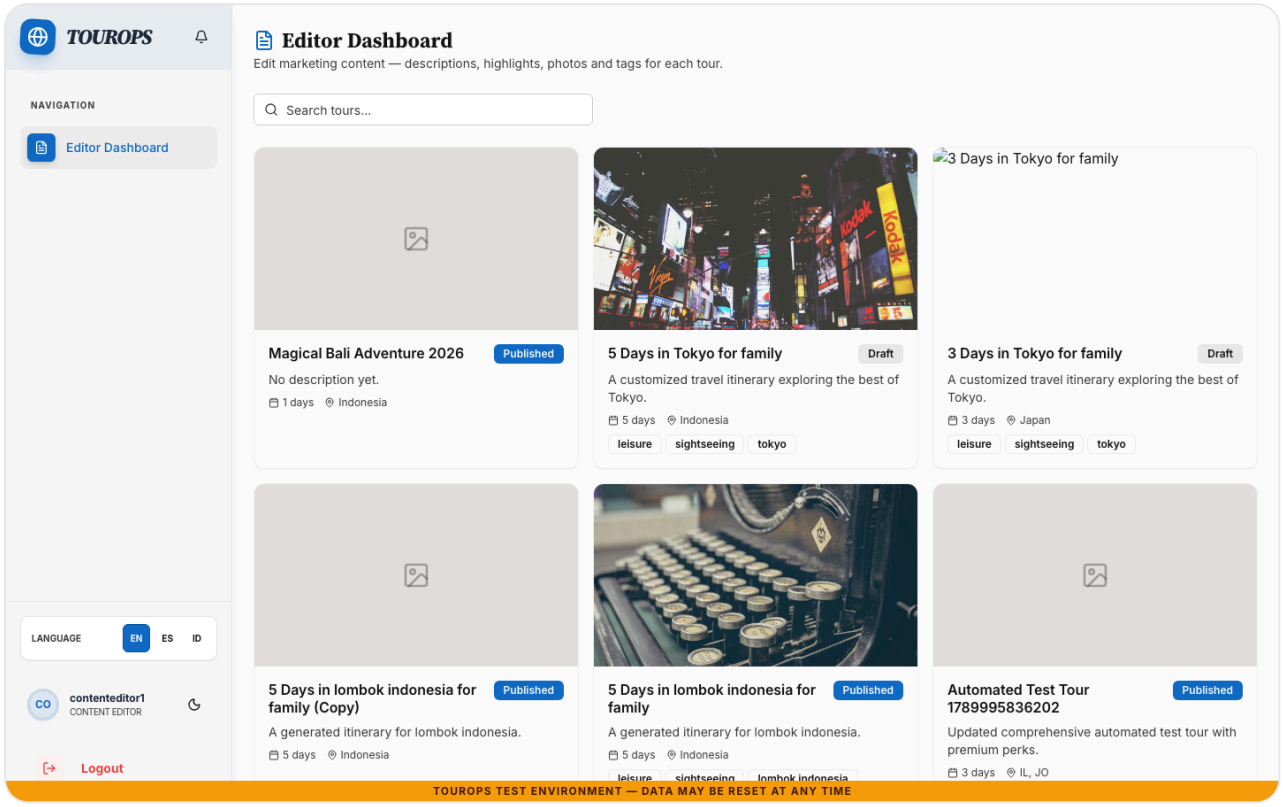

Validation checklist

- Copy is clear and not ambiguous.
- No raw i18n keys appear.
- Text matches the brand voice.

Warnings / watch-outs

- Do not alter pricing or schedule meaning through copy edits.
- Do not publish while translations are incomplete.

App screenshot

Content Editor view

Flight Agent

Home route: `/ops/flight-agent`

Manages flight data, ticketing references, and airline pricing.

Login credentials

- **Username:** flightagent1
- **Password:** password123

Main responsibilities

- Provides airfare and route pricing used in pricing calculations.
- Keeps the airline catalog clean and useful.
- Checks route/from-to and validity information.

Daily workflow

1. Open the flight/airline agent page.
2. Review airlines and active rates.
3. Update fares when prices change.
4. Validate route and currency values.

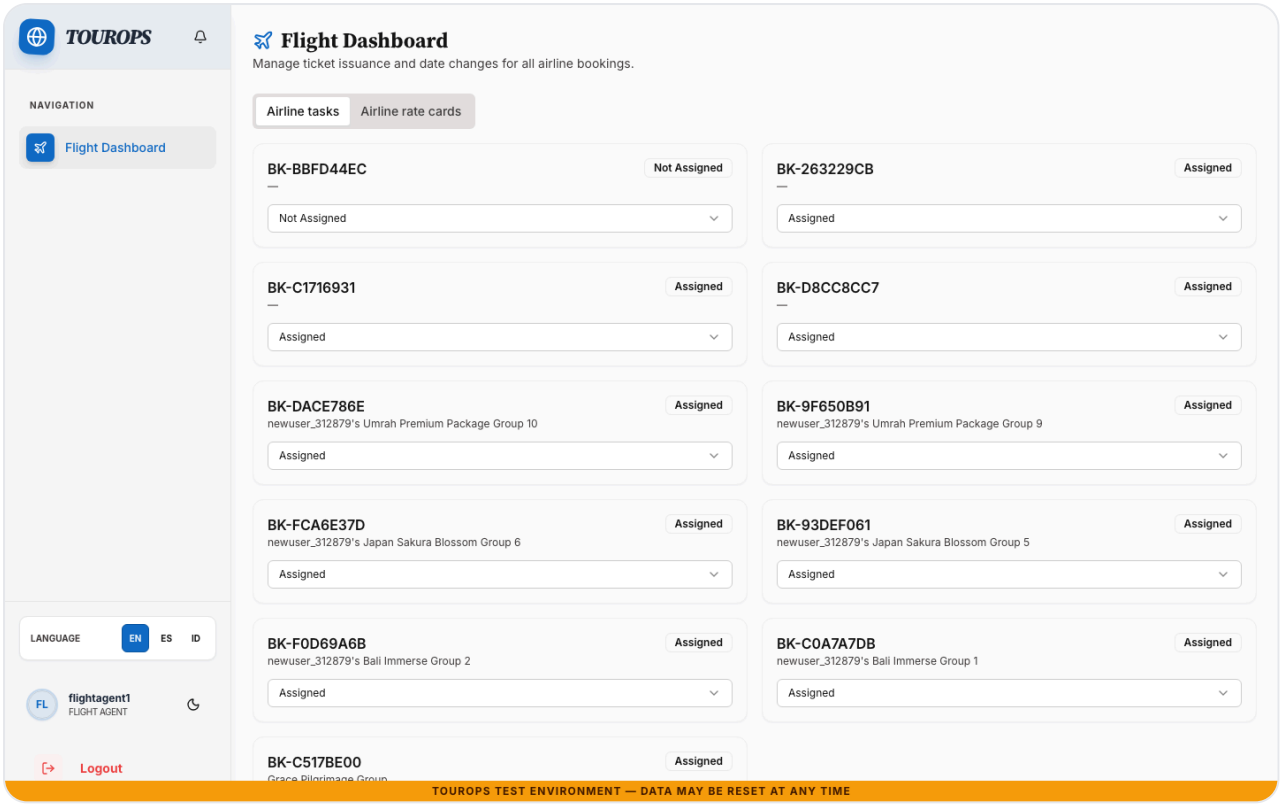

Validation checklist

- Airline name is correct.
- Route from/to is valid.
- Rates have a valid date range.

Warnings / watch-outs

- Do not enter arbitrary routes.
- Do not use prices without a validity period.

App screenshot

Flight Agent view

Tour Builder

Home route: `/ops/tour-builder`

Builds itineraries, day-by-day items, and tour component structure.

Login credentials

- **Username:** tourbuilder1
- **Password:** password123

Main responsibilities

- Creates tours from scratch.
- Arranges tour days and schedule items.
- Links hotels, guides, transport, and sights to the itinerary.

Daily workflow

1. Open the Tour Builder dashboard.
2. Create or edit the tour you are preparing.
3. Add days and arrange items per day.
4. Ensure each component has the correct cost.

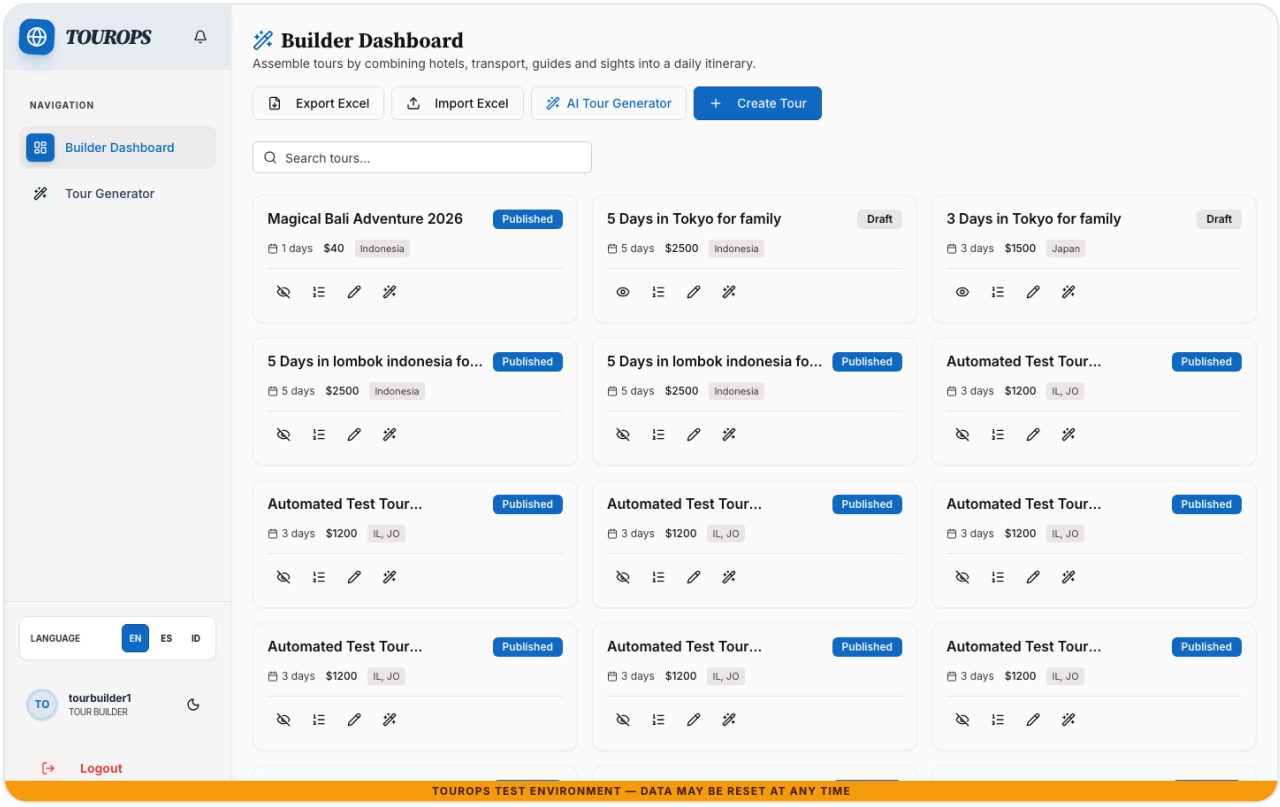

Validation checklist

- Itinerary is complete and ordered.
- Hotel / guide / transport data is linked correctly.
- Tour is ready for pricing.

Warnings / watch-outs

- Do not leave important items at zero without a reason.
- Do not publish a tour while the day structure is still changing.

App screenshot

Tour Builder view

Supplier

Home route: `/supplier`

Shared supplier role for managing tasks, rates, and operational documents.

Login credentials

- **Username:** supplier1
- **Password:** password123

Main responsibilities

- Handles general supplier work.
- Views and completes assigned tasks.
- Manages supplier-owned data and records.

Daily workflow

1. Open the Supplier Dashboard.
2. Check the relevant task and rate tabs.
3. Update data or upload documents when requested.
4. Report issues through messages or workflow updates.

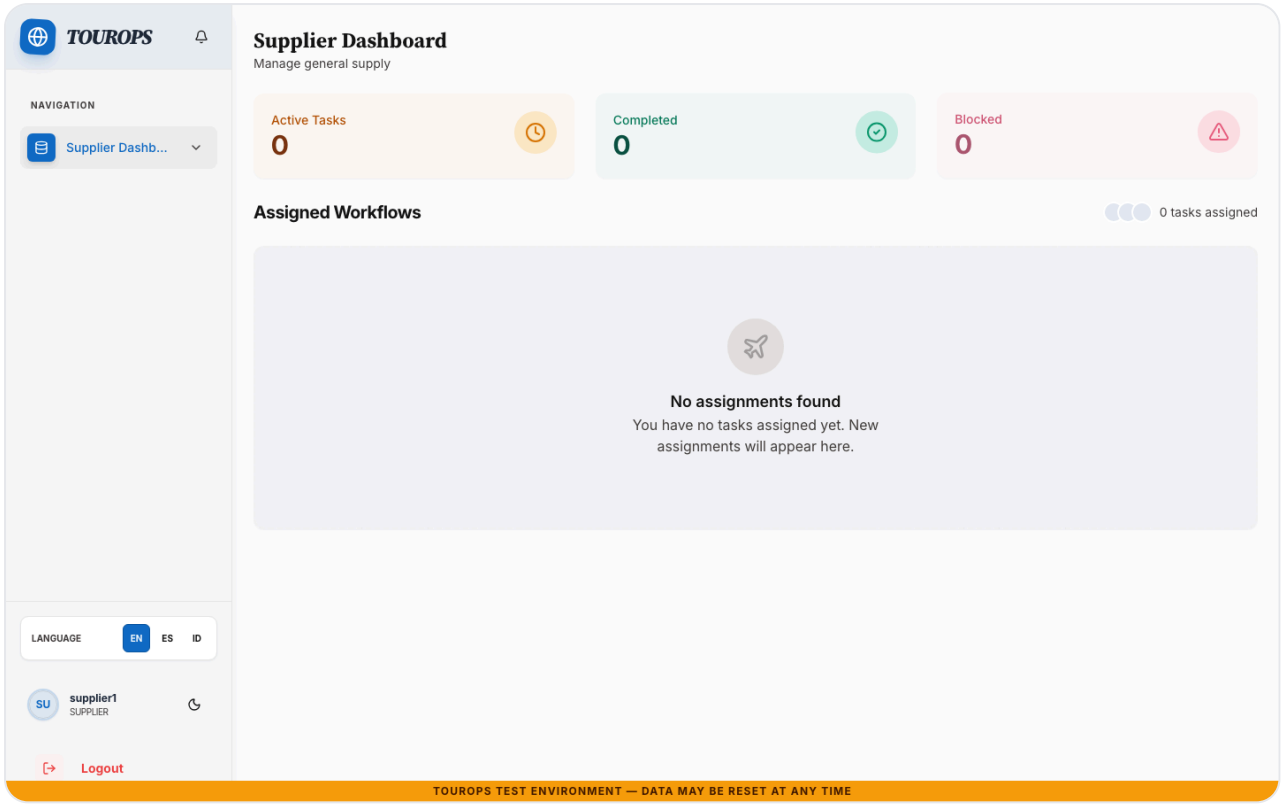

Validation checklist

- Assignments are complete.
- Documents are uploaded.
- Statuses are updated where needed.

Warnings / watch-outs

- Do not access data outside supplier scope.
- Do not save rates without verification.

App screenshot

Supplier view

Tour Leader

Home route: `/ops/tour-leader`

Reviews manifests, monitors participants, and executes field duties without financial access.

Login credentials

- **Username:** tourleader1
- **Password:** password123

Main responsibilities

- Opens the assigned tour manifest.
- Monitors participants and field status.
- Protects customer financial privacy.

Daily workflow

1. Open the Tour Leader dashboard.
2. Check the manifest and participant list.
3. Review today’s tasks or schedule.
4. Report incidents to operations.

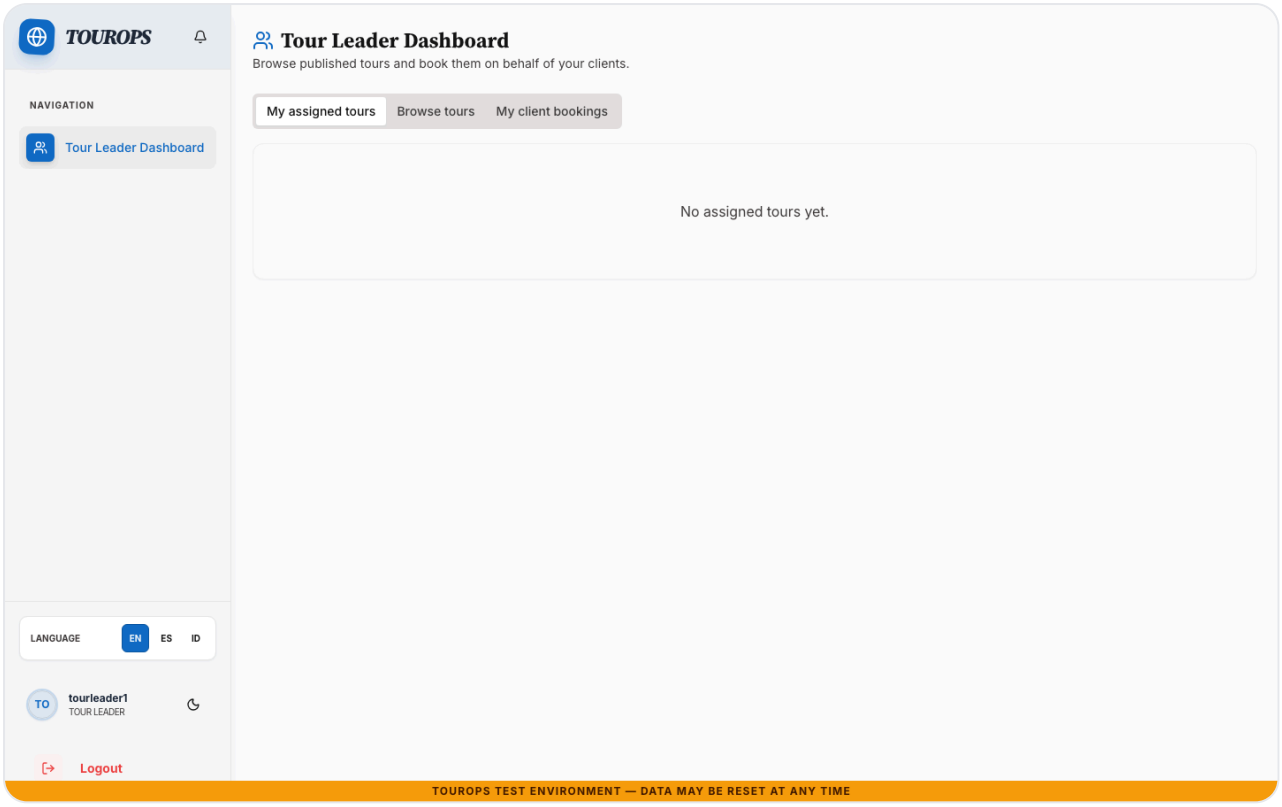

Validation checklist

- Manifest matches the booking.
- Participant names are correct.
- No financial data is visible.

Warnings / watch-outs

- Do not open finance pages.
- Do not expose participant personal data.

App screenshot

Tour Leader dashboard

Accounting

Home route: `/ops/accounting`

Manages payments, reconciliation, and financial booking status.

Login credentials

- **Username:** accounting1
- **Password:** password123

Main responsibilities

- Validates payments and settlement status.
- Updates payment status once proof is verified.
- Ensures ledgers and transactions match the booking.

Daily workflow

1. Open the accounting dashboard.
2. Review payment lists and outstanding balances.
3. Update payment status when verification is complete.
4. Check invoices and ledgers for mismatches.

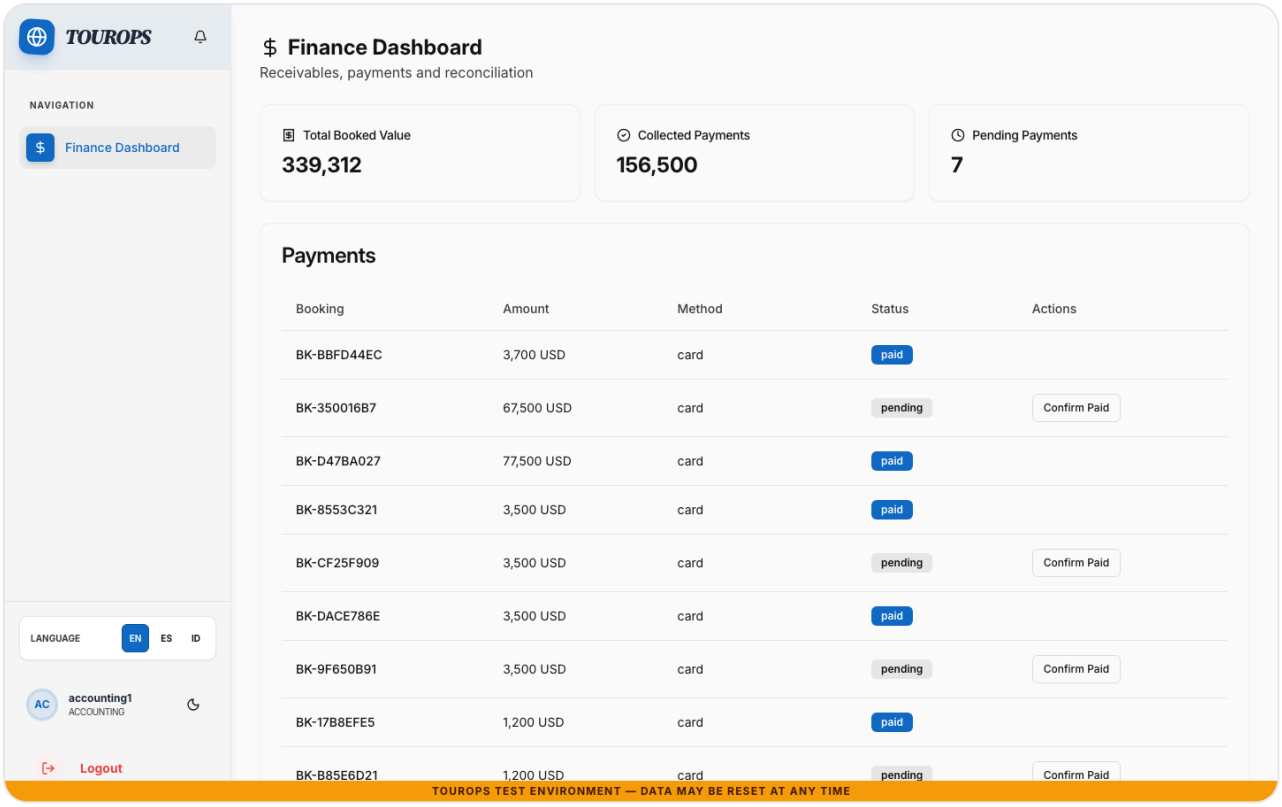

Validation checklist

- Payment statuses are accurate.
- Amounts match the documents.
- No duplicate transactions exist.

Warnings / watch-outs

- Do not change payments without evidence.
- Do not open finance data outside scope.

App screenshot

Accounting dashboard

Support Agent

Home route: `/ops/support`

Handles customer questions, operational issues, and escalations.

Login credentials

- **Username:** supportagent1
- **Password:** password123

Main responsibilities

- Helps customers or internal users solve problems.
- Routes issues that need follow-up to the right team.
- Records communication and resolution status.

Daily workflow

1. Open the support page.
2. Check incoming tickets or requests.
3. Reply with clear instructions.
4. Escalate issues involving finance or approvals.

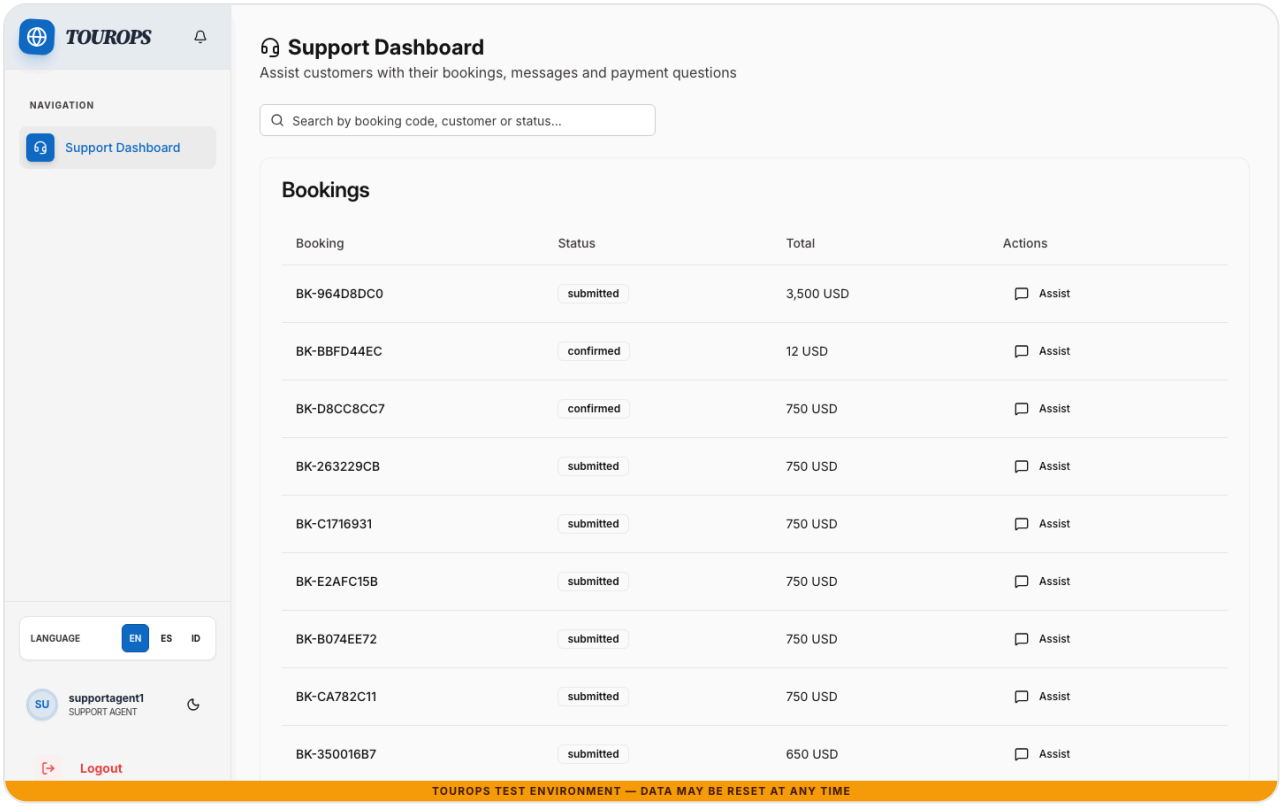

Validation checklist

- Messages are handled on time.
- No sensitive data is shared.
- Follow-up status is recorded.

Warnings / watch-outs

- Do not grant admin access.
- Do not modify financial records without authorization.

App screenshot

Support Agent view

Operations Manager

Home route: `/ops`

Manages workflows, task statuses, and service fulfilment flow.

Login credentials

- **Username:** operationsmanager1
- **Password:** password123

Main responsibilities

- Handles daily assignments and workflow progress.
- Moves task statuses based on actual field conditions.
- Ensures the 5-step service checklist is executed.

Daily workflow

1. Open the ops dashboard.
2. Check pending and in-progress assignments.
3. Update statuses based on verified progress.
4. Close workflows that are complete.

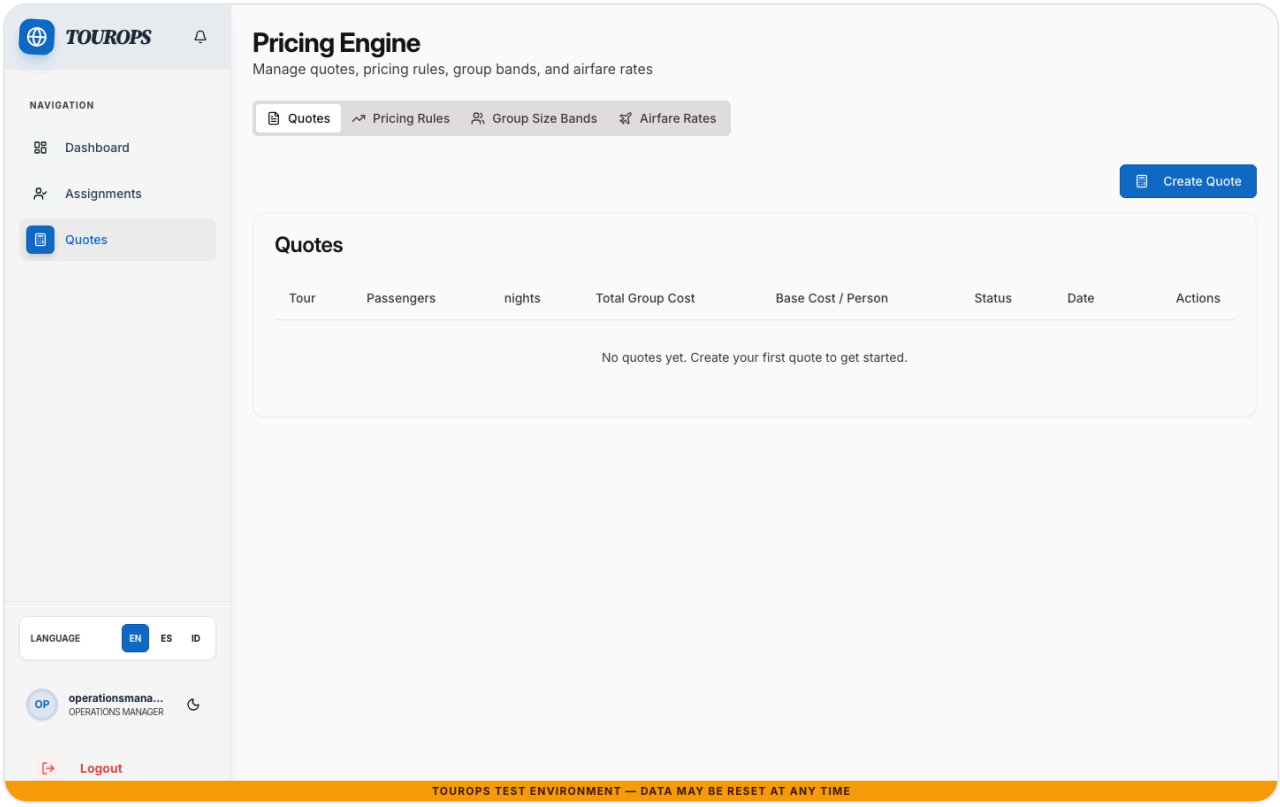

Validation checklist

- Each status has a clear reason.
- No task is left hanging.
- Service checklist is complete.

Warnings / watch-outs

- Do not skip required statuses.
- Do not close tasks without verification.

App screenshot

Operations Manager dashboard

Customer

Home route: `/tours`

Browses public tours, creates bookings, manages bookings, and accesses the passenger portal.

Login credentials

- **Username:** customer1
- **Password:** password123

Main responsibilities

- Browses the public tour catalog.
- Creates bookings and follows their status.
- Manages traveler data and change requests.

Daily workflow

1. Open the tour catalog.
2. Review tour details and select a departure.
3. Create a booking or add travelers if needed.
4. Track the booking in My Bookings and the passenger portal.

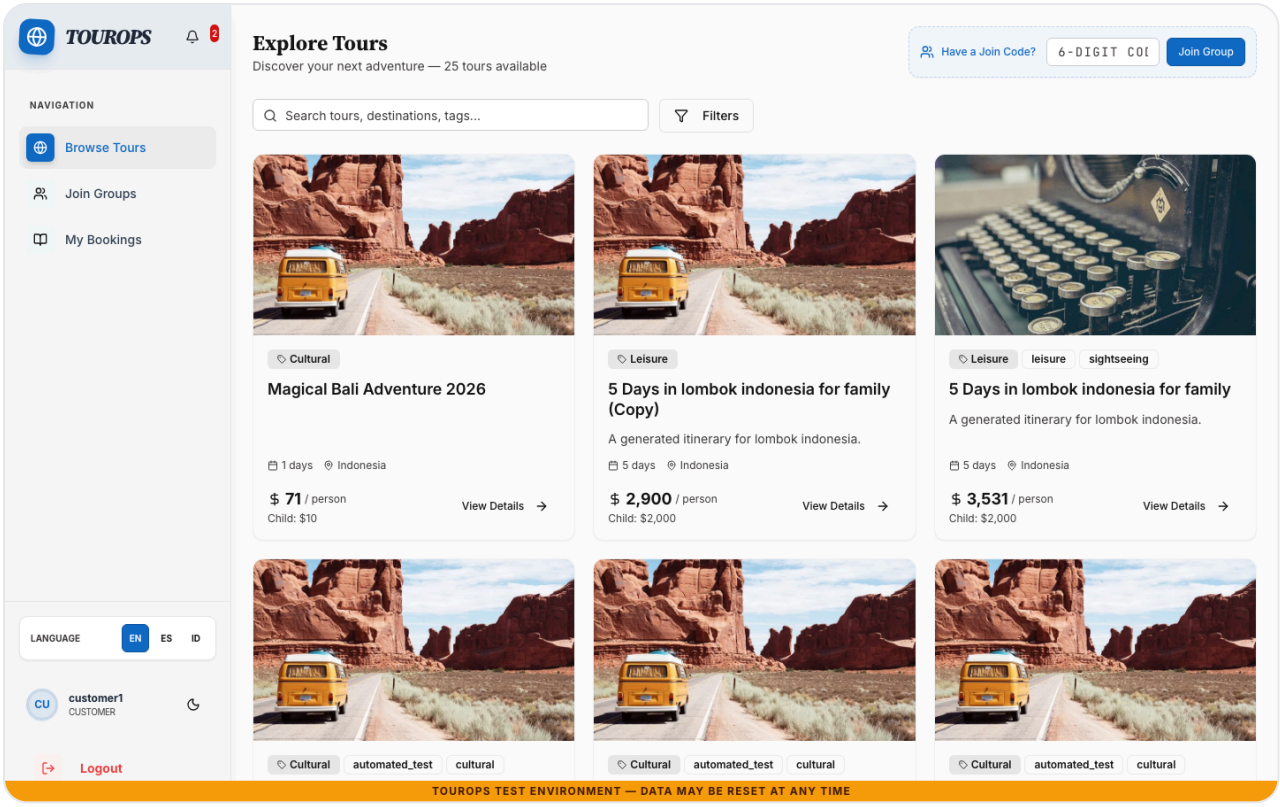

Validation checklist

- Tour selection comes from valid public data.
- Passenger count matches capacity.
- Traveler data is complete before departure.

Warnings / watch-outs

- Do not open staff or supplier pages.
- Do not edit data that does not belong to you.
